

Integrated Productivity Tools has created an ecommerce starter package for the business that is eager to start selling its product online. The starter package results in a fully operational store ready to take orders, built quickly at a fixed price.

## 1. Choose Hosting

Choose a web hosting plan and register a domain.

## 2. Choose Theme

Choose a website design theme to give your ecommerce shop an attractive, branded look and feel.

## 3. Choose Payment

Choose a default and alternate payment gateways for customers to purchase products.

## 4. Add Shipping

Define shipping options and geographic shipping zones.

## Web Hosting and Domain Registration

The Starter Package is built on a WordPress - WooCommerce platform. Any WordPress optimized hosting plan offering SSL and sufficient memory, processor and storage resources are acceptable.

## Design Themes

Themes are pre-built webpage templates where the page layout, typography, menu, header and footer have already been designed and only need to have content added.

## Payment Gateways

Payment gateways are the means for you to accept money from your customers, through trustworthy third-party financial processors.

## Shipping Zones and Methods

Shipping zones are the geographic areas you are willing to ship to; methods are the delivery options, such as DHL, UPS or Canada Post.

## How to Buy

Contact IPT at:
